

## GENESIS OF MAN

*Genesis of Man* details the unknown history of Earth from 35 million years ago, interlaced with spiritual philosophy and truth. It brings together many different subject areas, including the Nephilim, Egypt, Atlantis, the Knights Templar and various themes from the Da Vinci Code, including the so-called Jesus bloodline. The underlying theme though is the need to integrate and balance our own light and dark sides and use both aspects to help us grow. The information is presented in an easy to read format, in chronological sequence, utilizing both mainstream and esoteric sources.

"*Genesis of Man* covers some highly topical and controversial subjects regarding religion and science.

If you have read and liked *The God Delusion* by Richard Dawkins, then you will love this book because it serves the opposite viewpoint."
