Genesis of Man details the unknown history of Earth from 35 million years ago interlaced with spiritual philosophy and truth. It covers many different areas, including the Nephilim, Egypt, Atlantis, the Knights Templar, the Cathars, Gnosticism and the origins of the Christian faith, all linked together in chronological sequence. The main theme however is the need to integrate and maintain the balance between our own light and dark sides and use both aspects of ourselves to help us grow.
